PASSIONS

/r/homelab
I manage the network at my dorm and have a rack with networking/... equipment to play around with. For example, I have a Plex server running on my NAS and I have Pihole DNS set up on the network.

Linux & Hosting
I rent a VPS that I have manually configured to run my email, websites and do other interesting things. It was a lot of fun trying to get a 100% score on internet.nl
